

Power Reps, Inc. Representing Quality Manufacturers

(888) 326-3196 [Http://www.powerreps.com](http://www.powerreps.com) Fax (281) 633-0000

Power Reps, Inc.

Manufacturer's Representative

Power Reps, Inc.

CME Wire and Cable - Medium & High Voltage Cable— 600 volt thru 230KV Insulated & non-insulated, used in Utility systems for Transmission, Primary Distribution & Secondary Distribution. TRXLP and EPR Insulations — Aluminum & Copper Conductors — Primary & Secondary URD & Power Cables, Primary and Secondary Insulated Overhead, Bare Overhead for Transmission and Distribution.

<http://cmewire.com>

Alstom Grid - (Some Industrial markets)

Dead Tank Circuit Breaker 72.5KV thru 230 kV—40 to 63KA to 4000A

Live Tank Breakers - 72.5KV thru 500KV

Circuit Switchers — 72.5KV & 145KV 40KA to 3000A

RB Watkins—Transformers, Breaker and Substation Testing and Service

High Voltage Switchgear—230 thru 345KV Group operated switches

GIS—Gas Insulated Switchgear Medium and High Voltage applications

Large Power Transformers

High Voltage Instrument Transformers— 69 thru 765KV CTs, PTs and CCVTs

Line Traps/Line Turners/Reactors

Inertia-REPL— Low Voltage & Medium Voltage Terminations, PILC Joints, Motor Connection Kits and other Heat Shrinkable Cable Accessories.

<http://www.inertia-repl.com/>

Power Systems Development (Alstom Grid) - High voltage EPC Substation Systems—Substation Design, Project Management, Procurement, Construction and Commissioning. <http://www.psdohio.com>

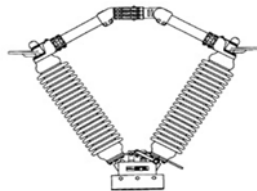

RuggedCom—The RuggedWireless™ family are industrially hardened Ethernet switches which integrate IEEE 802.11b/g Wireless Access Points, with fully managed wired 8-Port Ethernet switches providing six Fast Ethernet copper only ports and two optional copper or fiber ports. With the installation of the RS900W Series wireless access point, a network designer will achieve the integration of wired and wireless networks. The RS900W and RS910W can be configured as an access, client, or bridge device. <http://www.ruggedcom.com/>

Newell-PSN - Complete line of **solid core, station and line, post porcelain Insulators**, for distribution, substation and transmission with over 50 years of manufacturing experience and performance testing. The solid core design ensures 100% puncture-proof reliability throughout the insulator life.

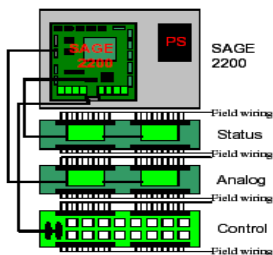

<http://www.newellporcelain.com>

Royal Switchgear - **Group Operated Air Break Switches**—Copper and Aluminum - Vertical Break, Side Break, Center Break & "V" Switches - 15KV thru 230KV up to 3000A.

HOOKSTICK Operated Switches — 5kV thru 161kV up to 4000A

Options: Al. or Cu. **Substation Connectors**—Aluminum, Copper & Bronze—Bolted or Welded. <http://www.royalswitchgear.com>

Telvent—**Remote Terminal Units (RTU)**—With years of experience with retrofit applications and new, Telvent can save you money on Hardware cost, Field wiring, Engineering, No changes to the master station and provide STATE of the ART equipment with added functionality. From RTUs with Config@Web easy & intuitive configuration software. Complete SCADA Systems Solutions.

<http://www.telvent.com/en/>

Visit our website for more information on any of our manufacturers—<http://www.powerreps.com>

Advanced Power Technology- Transformer Temperature Monitors- With calculated winding temperature, LTC conditioning monitoring, and data logging. **Transformer Cooling System Monitor** for monitoring of large substation apparatus. **Time & Temperature Controller** Single / Dual probe ambient temperature controller –Automatically change relay setting groups based on temperature. <http://www.advpowertech.com/>

Primax—Battery Chargers & Battery systems for communications and power applications. Cabinet designed for long life and access to internal parts. One PC board for all chargers to minimize spare part to stock. <http://www.primax-e.com/>

Satec—Multi-function Power Meters—Designed for the toughest Electrical Environments and a great value. From the **PM130+** to the **ez-Pac** with Fault Recording & Sequence of events, power quality, and much more. Satec uses true 3phase measurement, all meters have revenue grade metering accuracy. We have a product for almost every application. <http://satec-global.com/eng/>

ELECTROMARK — Leading Source for Utility Marking Products for safety, operations, and maintenance application. Signs, lettering, numbers and seals. <http://www.electromark.com/>

Custom Plastics— Utility guy guards, Riser Guards, Wildlife Protectors, Cable Saddles, etc.—Custom Snapper® and Mini-Snapper® guy markers have been the industry's standard for years. Made of UV stabilized Polyethylene or PVC, they resist fading and deterioration from weather conditions. <http://www.customutility.com/>

Northern Transformers—

- 750 kVA up to and including 25 mVA • Maximum voltage classification of 138 kV
- Tamperproof units up to 44 kV • Dual or multiple primary and secondary voltages
- Autotransformers • On Load and Off Load Tap Changers
- Sealed tank, conservator type and inert-gas pressure units • Mineral Oil • Silicone • R-Temp® • Rewinding and Refurbishing of all manufacturer's products

<http://www.northerntransformer.com>

Synergy Energy— High Efficiency Transformers- 9kva to 5000kva
 Harmonic Mitigating Transformers-60amp to 2000amp of neutral current— Electronic Load Rated Transformers - Isolation Transformers 5kva to 10,000kva <http://www.synergyenergyinc.com/>

Tavrida— 5 -38kV **Vacuum Circuit Breakers and Reclosers**, 20kA to 31.5kA, 150,000 close open operations at full load. 1000V 400A Vacuum contactor. Maintenance Free - 5 year warranty on fixed mounted breaker, 3 year warranty on draw out breaker. <http://www.tavrida-na.com>

POWELL-ESCO— Pad mount, metal enclosed, Vacuum, oil and SF6 distribution class switchgear, Dead-front and Live-front, Multiple switched ways, manual & automatic transfer switches, 200amp& 600amp, 5kV-38kV. <http://www.powellind.com/>

<http://www.rsi-global.com/>

TRANTECH™
 RADIATOR PRODUCTS, INC.
